

## Project Design Phase-II Technology Stack (Architecture & Stack)

|               |                                  |
|---------------|----------------------------------|
| Date          | 13 October 2022                  |
| Team ID       | PNT2022TMID26156                 |
| Project Name  | Project - Web Phishing Detection |
| Maximum Marks | 4 Marks                          |

### Technical Architecture:

The Deliverable shall include the architectural diagram as below and the information as per the table1 & table 2

**Table-1 : Components & Technologies:**

| <b>S.No</b> | <b>Component</b>    | <b>Description</b>   | <b>Technology</b>  |
|-------------|---------------------|--|--|
| 1.          | User Interface      | Web Application, Cloud UI  | HTML, CSS, JavaScript / Angular Js / React Js etc.             |
| 2.          | Application Logic-1 | Machine Learning Algorithms such as Random forest, Decision Tree , Logistic Regression and SVM. Python Flask Application for Web App   | Java / Python  |
| 3.          | Application Logic-2 | IBM Watson Speech to Text technology enables fast and accurate speech transcription in multiple languages for a variety of use cases, including but not limited to customer self-service, agent assistance and speech analytics. | IBM Watson STT service   |
| 4.          | Application Logic-3 | The IBM Watson Assistant service combines machine learning, natural language understanding, and an integrated dialog editor to create conversation flows between your apps and your users.                                       | IBM Watson Assistant   |
| 5.          | Database            | Stored Procedure (EXEC)  | MySQL, NoSQL, etc.   |
| 6.          | Cloud Database      | Database Service on Cloud  | IBM DB2, IBM Cloudant etc.                                     |
| 7.          | File Storage        | File storage requirements  | IBM Block Storage or Other Storage Service or Local Filesystem |

**Table-2: Application Characteristics:**

| S.No | Characteristics          | Description  | Technology                                    |
|------|--------------------------|--|---|
| 1.   | Open-Source Frameworks   | Gophish is a powerful, open-source phishing framework that makes it easy to test your organization's exposure to phishing. | Machine Learning                              |
| 2.   | Security Implementations | In our prototype we use encryption techniques and security algorithms on web application                                   | AES 256 , Cofense PDR                         |
| 3.   | Scalable Architecture    | Scalability is high due to accuracy provided by the model and Responsive UI/UX   | React Framework, jQuery, Bootstrap, Cloudfare |
| 4.   | Availability             | Available at NLP, Spam Detection ,Blacklisting or Reporting, and machine learning techniques                               | Acunetix, Intruder, Ghost Phisher             |
| 5.   | Performance              | Deployed and Tested with multiple algorithms and this system gives greater accuracy and better performance than other.     | Deep Learning                                 |
